Celanese Hosts Webinar on New Tribologically Modified Polymer for Complex Medical Drug Delivery Devices

Whitepaper showcases cutting-edge material solution creates smoother, quieter medical devices

DALLAS (APRIL 09, 2015) -- Celanese Corporation (NYSE: CE), a global technology and specialty materials company, will present “**New Tribologically Modified POM MT® Grades for Complex Medical Devices**” in a webinar on April 9, 2015, at 11:00 a.m. Eastern time hosted by industry-leading medical materials association Qmed.

During the 30-minute webinar, Wendy Johnson and Kirsten Markgraf, medical marketing manager and product development leader at Celanese, respectively, will present their findings from a recent whitepaper and provide details on how the company’s new, cutting-edge engineered material solutions are delivering improved technical properties, easy processability, and increased patient comfort.

“Celanese has for years been a leading, global engineered materials supplier to the medical device market,” said Andrew Brown, Global Medical Industry leader, Celanese. “We continue to expand our engineered polymers portfolio to deliver innovative material solutions that are improving the experience of the end-user and are meeting the growing demands of medical suppliers worldwide.”

Forward-Looking Statements

This release may contain “forward-looking statements,” which include information concerning the company’s plans, objectives, goals, strategies, future revenues or performance, capital expenditures, financing needs and other information that is not historical information. When used in this release, the words “outlook,” “forecast,” “estimates,” “expects,” “anticipates,” “projects,” “plans,” “intends,” “believes,” and variations of such words or similar expressions are intended to identify forward-looking statements. All forward-looking statements are based upon current expectations and beliefs and various assumptions. There can be no assurance that the company will realize these expectations or that these beliefs will prove correct. There are a number of risks and uncertainties that could cause actual results to differ materially from the forward-looking statements contained in this release. Numerous factors, many of which are beyond the company’s control, could cause actual results to differ materially from those expressed as forward-looking statements. Other risk factors include those that are discussed in the company’s filings with the Securities and Exchange Commission. Any forward-looking statement speaks only as of the date on which it is made, and the company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which it is made or to reflect the occurrence of anticipated or unanticipated events or circumstances.
