Celanese Sues European Distributor Selling Ace-K Produced by Chinese Manufacturer for Patent Infringement

DALLAS (December 1, 2017) – Celanese Corporation (NYSE: CE), a global technology and specialty materials company, today announced that it has filed a patent infringement lawsuit in Poland against Falken Trade Polska sp. z o.o. sp.k., a distributor (Distributor) of Acesulfame Potassium (Ace-K), a high-potency sweetener subject to recently granted European Patent No. 2 861 569. The complaint alleges that the Distributor is selling infringing Ace-K sweetener produced by a Chinese manufacturer. Celanese claims compensation for damages caused by the sale of patent infringing Ace-K.

Prior to filing this lawsuit, Celanese had successfully obtained a preliminary injunction against the Distributor preventing the Distributor from continuing to sell infringing Ace-K sweetener.

In March 2017, Celanese announced that it had filed a patent infringement lawsuit in Europe against three Chinese manufacturers of high-potency sweeteners, specifically Acesulfame Potassium (Ace-K). The complaint alleges that Suzhou Hope Technology Co., Ltd., Anhui Jinhe Industrial Co., Ltd., and Vitasweet Co., Ltd., are infringing European Patent No. 2 861 569 by continuing to unlawfully import infringing Ace-K sweetener into Europe.

Celanese continues to invest in manufacturing and quality improvements and is dedicated to robust research, development and customer support for the Sunett® sweetener products manufactured by its patented processes. The company will protect these investments to supply customers with quality engineered products, and will vigorously defend against unlawful manufacturing, importing, purchasing, selling and using of its patented technology in the United States, Europe, China and globally.

About Celanese

Celanese Corporation is a global technology leader in the production of differentiated chemistry solutions and specialty materials used in most major industries and consumer applications. Our two complementary business cores, Acetyl Chain and Materials Solutions, use the full breadth of Celanese's global chemistry, technology and business expertise to create value for our customers and the corporation. As we partner with our customers to solve their most critical business needs, we strive to make a positive impact on our communities and the world through The Celanese Foundation. Based in Dallas, Celanese employs approximately 7,500 employees worldwide and had 2016 net sales of \$5.4 billion. Forward-Looking Statements

This release may contain "forward-looking statements," which include information concerning the company's plans, objectives, goals, strategies, future revenues or performance, capital expenditures, financing needs and other information that is not historical information. When used in this release, the words "outlook," "forecast," "estimates," "expects," "anticipates," "projects," "plans," "intends," "believes," and variations of such words or similar expressions are intended to identify forward-looking statements. All forward-looking statements are based upon current expectations and beliefs and various assumptions. There can be no assurance that the company or its customers will realize these benefits or that these expectations will prove correct. There are a number of risks and uncertainties that could cause actual results to differ materially from the forward-looking statements contained in this release. Numerous factors, many of which are beyond the company's control, could cause actual results to differ materially from those expressed as forward-looking statements. Other risk factors include those that are discussed in the company's filings with the Securities and Exchange Commission. Any forward-looking statement speaks only as of the date on which it is made, and the company undertakes no obligation to update any forward-looking statements to reflect events or circumstances after the date on which it is made or to reflect the occurrence of anticipated or unanticipated events or circumstances.
