1. Product and company identification

Trade Name

Dimethylamine, anhydrous

Manufacturer, importer, supplier
Celanese Ltd.
222 W. Las Colinas Blvd., Suite 900N
Irving, TX 75039
United States
Phone: 972 443 4000
Internet: www.celanese.com

Celanese Operations México, S. de R.L. de C.V:
Freeway Coatzacoalcos-Villahermosa Km. 12.3 C.P. 96400
Coatzacoalcos, Ver
Mexico
Phone: (921) 211-5000/211-5048
Fax: (921) 211-5003***

Transportation emergency phone numbers:
In USA, call 800 424 9300
Outside USA, call 703 527 3887, collect calls accepted.
In Mexico, call (921) 211-5048, 211-5000

Identified uses
chemical intermediate

2. Hazard Identification

Label elements
Signal Word
Danger***

Hazard Statements
Contains gas under pressure; may explode if heated
Extremely flammable gas
Harmful if swallowed
Harmful if inhaled
Causes skin irritation
Causes serious eye damage
May cause an allergic skin reaction
May cause respiratory irritation

Precautionary statements
Keep away from heat/sparks/open flames/hot surfaces. - No smoking.
Leaking gas fire: Do not extinguish, unless leak can be stopped safely
Eliminate all ignition sources if safe to do so
Do not eat, drink or smoke when using this product.
Avoid breathing dust/fume/gas/mist/vapors/spray.
Use only outdoors or in a well-ventilated area.
Wear protective gloves/ eye protection/ face protection.
Wash face, hands and any exposed skin thoroughly after handling.
Contaminated work clothing should not be allowed out of the workplace
IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell
Rinse mouth
IF INHALED: Remove person to fresh air and keep comfortable for breathing.
Call a POISON CENTER or doctor if you feel unwell.
IF ON SKIN: Wash with plenty of water.
Take off all contaminated clothing and wash it before reuse
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
Immediately call a POISON CENTER or doctor.
Store locked up.
Store in a well-ventilated place. Keep container tightly closed
Protect from sunlight
Dispose of contents/ container to an approved waste disposal plant.

3. Composition/information on ingredients

<table>

<td>Dimethylamine</td>
<td>124-40-3</td>
<td>99</td>
</tr>
</tbody>
</table>

2 of 11
4. First aid measures

General Information
Remove contaminated, soaked clothing immediately and dispose of safely.

Skin
Wash off with 5% acetic acid followed by large amounts of plain water for at least 5 min as a final step. Immediate medical treatment necessary as untreated skin corrosion heals slowly and with difficulty.

Eyes
Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Call a physician immediately.

Inhalation
Keep at rest. Aerate with fresh air. Call a physician immediately. Symptoms of poisoning may only appear several hours later.

Ingestion
Call a physician immediately. Do not induce vomiting without medical advice.

5. Fire-fighting measures

NFPA: Health: 3 Flammability: 4 Instability: 0

Suitable extinguishing media
Use CO2 or dry chemical for small fires, Alcohol-resistant foam, Water spray, DO NOT extinguish a gas fire unless effective immediate shut-off of gas flow is possible

Extinguishing media which must not be used for safety reasons
Do not use a solid water stream as it may scatter and spread fire.

Special exposure hazards arising from the substance or preparation itself, its combustion products, or released gases
Under conditions giving incomplete combustion, hazardous gases produced may consist of
Carbon monoxide
Carbon dioxide (CO2)
Nitrogen oxides (NOx)
Combustion gases of organic materials must in principle be graded as inhalation poisons

Special protective equipment for fire-fighters
self-contained breathing apparatus (EN 133).

Environmental precautions
Water run-off and vapor cloud may be corrosive. Dike and collect water used to fight fire***

Other Information
Cool containers / tanks with water spray. Keep people away from and upwind of fire.***

6. Accidental release measures
Personal precautions
Do not get in eyes, on skin, or on clothing. Do not breathe vapors, aerosols.. Keep away from heat and sources of ignition. Provide adequate ventilation. Keep people away from and upwind of spill/leak.

**Isolation**
Keep unnecessary people away; isolate hazard area and deny entry. Isolate for 800 meters or 0.5 miles in all directions if tank, rail car, or tank truck is involved in fire.***

Environmental precautions
Prevent further leakage or spillage. Do not discharge into the drains/surface waters/groundwater.

Methods for cleaning up
Remove all sources of ignition. Seal off leak. Keep people away from and upwind of spill/leak.

Authority Notification
Within the United States, call the National Response Center (800-424-8802) and appropriate state and local authorities if the quantity released over 24 hours is equal to or greater than the reportable quantity listed below:

1000 lb/454kg

7. Handling and storage

Advice on safe handling
Provide sufficient air exchange and/or exhaust in work rooms. Refill and handle product only in closed system.

Protection - fire and explosion:
Keep away from sources of ignition - No smoking. Take necessary action to avoid static electricity discharge. Ground and bond containers when transferring material. In case of fire, emergency cooling with water spray should be available.

Technical measures/Storage conditions
Keep tightly closed in a dry, cool and well-ventilated place. Handle an open container with care. Store under nitrogen.

Material storage
Store locked up.. Keep away from direct sunlight***

Incompatible products
Keep away from: strong acids, oxidizing agents

8. Exposure controls / personal protection

OSHA Exposure Limits

</tr>
</tbody>
</table>

### Exposure controls

#### Engineering measures

General or dilution ventilation is frequently insufficient as the sole means of controlling employee exposure. Local ventilation is usually preferred. Explosion-proof equipment (for example fans, switches, and grounded ducts) should be used in mechanical ventilation systems.

#### Protective equipment

A safety shower and eyewash should be readily available.

#### General advice

Do not breathe vapors or spray mist. Do not get in eyes, on skin, or on clothing. Use only in an area equipped with a safety shower.
Respiratory protection

Based on workplace contaminant level and working limits of the respirator, use a respirator approved by NIOSH. The following is the minimum recommended equipment for an occupational exposure level. To estimate an occupational exposure level see Section 8 and Section 11.

For concentrations > 1 and < 10 times the occupational exposure level: Use air-purifying respirator with full facepiece and organic vapor cartridge(s) or air-purifying full facepiece respirator with an organic vapor canister or a full facepiece powered air-purifying respirator fitted with organic vapor cartridge(s). The air purifying element must have an end of service life indicator, or a documented change out schedule must be established. Otherwise, use supplied air.

For concentrations more than 10 times the occupational exposure level and less than the lower of either 100 times the occupational exposure level or the IDLH: Use Type C full facepiece supplied-air respirator operated in positive-pressure or continuous-flow mode.

For concentrations > 100 times the occupational exposure level or greater than the IDLH level or unknown concentrations (such as in emergencies): Use self-contained breathing apparatus with full facepiece in positive-pressure mode or Type C positive-pressure full facepiece supplied-air respirator with an auxiliary positive-pressure self-contained breathing apparatus escape system.

For escape: Use self-contained breathing apparatus with full facepiece or any respirator specifically approved for escape.***

Skin protection:
Wear impervious clothing and gloves when there is a reasonable chance for skin contact.***

Eye/face protection:
In addition to goggles, wear a face shield if there is a reasonable chance for splash to the face..

9. Physical and chemical properties

</tr>
</tbody>
</table>
10. Stability and reactivity

Chemical stability
Stable under normal conditions of handling, use and transportation.***

Conditions to avoid
Avoid any source of ignition. Avoid contact with heat, sparks, open flame, and static discharge.***

Incompatible Materials
Keep away from:
strong acids
strong oxidizing agents

Hazardous Combustion or Decomposition Products:
In the presence of sufficient oxygen, combustion may produce oxides of nitrogen and carbon dioxide. Nitrogen oxides can react with water to produce nitric acid. Combustion under oxygen starved conditions may produce numerous toxic products including carbon monoxide, cyanides and nitriles.***

11. Toxicological information

Potential health effects

Routes of exposure
Skin, eyes, inhalation, ingestion.

Immediate effects

<table>
<thead>
<tr>
<th>Route</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Skin</td>
<td>Causes skin burns. May cause allergic skin reaction. Symptoms of overexposure include: Redness or discoloration, swelling, itching, burning or blistering of skin.***</td>
</tr>
<tr>
<td>Eyes</td>
<td>Causes eye burns. Symptoms of exposure may include: Eye irritation, burning sensation, pain, watering, and/or change of vision. Loss of vision.***</td>
</tr>
<tr>
<td>Inhalation</td>
<td>Causes respiratory tract burns. Harmful if inhaled. Symptoms of exposure may include: Nasal discharge, hoarseness, coughing, chest pain and breathing difficulty. Accumulation of fluid in the lungs (pulmonary edema); symptoms can be delayed for several hours.</td>
</tr>
<tr>
<td>Ingestion</td>
<td>May be harmful if swallowed. Symptoms of exposure may include: Nausea, vomiting, loss of appetite, gastrointestinal irritation and/or diarrhea. Severe damage to the mouth, throat esophagus and/or stomach.***</td>
</tr>
</tbody>
</table>

Target organ effects
Overexposure (prolonged or repeated exposure) may cause:
Injury to the eyes
Digestive tract damage
Respiratory tract damage
Skin damage.
***
### Medical conditions which may be aggravated by exposure:
- Skin
- Eyes
- Digestive tract

13. Disposal considerations

Disposal considerations
Dispose of spilled material in accordance with state and local regulations for hazardous waste. Recommended methods are incineration or biological treatment at a federally or state-permitted disposal facility. Note that this information applies to the material as manufactured; processing, use, or contamination may make this information inappropriate, inaccurate, or incomplete.

Note that this handling and disposal information may also apply to empty containers, liners and rinsate. State or local regulations or restrictions are complex and may differ from federal regulations. This information is intended as an aid to proper handling and disposal; the final responsibility for handling and disposal is with the owner of the waste. ***

EPA Hazardous Waste Code(s): D001
