4. FIRST AID MEASURES

General advice : Do not leave the victim unattended.

In case of eye contact : Remove contact lenses. Protect unharmed eye. If eye irritation persists, consult a specialist.

In case of skin contact : If on skin, rinse well with water. If symptoms persist, call a physician.

If inhaled : If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

If swallowed : Keep respiratory tract clear. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

Most important symptoms and effects, both acute and delayed : None known.

5. FIREFIGHTING MEASURES

Suitable and unsuitable extinguishing media
SAFETY DATA SHEET

Paraformaldehyde 91-93%

Version: 1.0  Revision Date: 2019/12/19  SDS Number: 000000033679  Date of last issue: -  Date of first issue: 2019/12/19

Suitable extinguishing media: Water  Foam  Dry chemical  Carbon dioxide (CO2)

Specific hazards during firefighting: Do not use a solid water stream as it may scatter and spread fire. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

Hazardous combustion products: Carbon oxides  Formaldehyde

Specific extinguishing methods: Standard procedure for chemical fires. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

Special protective equipment for firefighters: Wear self-contained breathing apparatus for firefighting if necessary.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Avoid contact with the skin and the eyes. Avoid dust formation. Avoid breathing dust. Ensure adequate ventilation. Mark the contaminated area with signs and prevent access to unauthorized personnel.

Environmental precautions: Do not flush into surface water or sanitary sewer system. Do not let product enter drains.

Methods and materials for containment and cleaning up: Pick up and arrange disposal without creating dust. Sweep up and shovel. Do not create a powder cloud by using a brush or compressed air. Non-sparking tools should be used. Keep in suitable, closed containers for disposal.

7. HANDLING AND STORAGE

Advice on protection against fire and explosion: Provide appropriate exhaust ventilation at places where dust is formed. During processing, dust may form explosive mixture in air. Take measures to prevent the build up of electrostatic charge. Do not empty bag over drums with ignitable gas mixtures. Use explosion-proof equipment.

Advice on safe handling: For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Minimize dust generation and accumulation.
Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Ensure all equipment is electrically grounded before beginning transfer operations.

Paraformaldehyde decomposes to formaldehyde which can build up in a shipping container depending on time and temperature during transit. The level of formaldehyde exposure may be instantaneously high when the shipping container is opened. Provide adequate ventilation.

Conditions for safe storage: Keep container closed when not in use.
Keep in a dry, cool and well-ventilated place.
Store locked up.
Electrical installations / working materials must comply with the technological safety standards.

Materials to avoid: Acids
Bases
Amines
Oxidizing agents
Reducing agents

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Components with workplace control parameters
Contains no substances with occupational exposure limit values.
Formaldehyde is slowly emitted from Paraformaldehyde. The release rate and air concentration are dependent on storage conditions including temperature and ventilation. This exposure limit information on formaldehyde is provided for your reference.

Engineering measures: Use with local exhaust ventilation.
Use explosion-proof equipment.
