## SECTION 11: Toxicological information

### **11.1. Information on toxicological effects**

Toxicological data are not available. Observe the usual hygienic measures for handling chemicals.

## SECTION 12: Ecological information

**Ecotoxicity:**The effects of resin pellets on the wildlife that may ingest them is not well understood. In the case of seabirds, some marine biologists believe that the fowl may not be able to pass plastic pellets through their digestive tracts. Thus, large quantities of ingested pellets may cause intestinal blockage, false feelings of satiation or reduction in absorption of nutrients, causing malnutrition and starvation. The goal of SPI's Operation Clean Sweep is zero loss of pellets into the environment..

**Environmental Fate/Information:**This material is considered to be non-biodegradable.. Do not discharge product unmonitored into the environment.
