## Special protective equipment for fire-fighters

Wear self-contained breathing apparatus and protective suit.

## Other Information

Keep people away from and upwind of fire.. Dust can form an explosive mixture in air. Water runoff can cause environmental damage..

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Do not breathe dust. Avoid dust formation. Non-processed plasticates and arising cakes should be cooled down basically in a water basin, otherwise there threatens a danger of thermal-oxidative decomposition..

### 6.2. Environmental precautions

No special environmental precautions required.

### 6.3. Methods and material for containment and cleaning up

Use mechanical handling equipment. Dispose of in accordance with local regulations.

### 6.4. Reference to other sections

Consult trained personnel. Consider the information for "Personal Protection" in chapter 8 of this Safety Data Sheet.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

#### Hygiene measures

When using, do not eat, drink or smoke. Wash hands before breaks and at the end of workday.

#### Advice on safe handling

Do not handle hot or molten material without appropriate protective equipment. Do not exceed recommended process temperatures to minimize release of decomposition products. Maintain good housekeeping in work areas.. Provide appropriate exhaust ventilation at machinery and at places where dust can be generated.

#### Incompatible products

Strong bases\*\*\*

#### Protection - fire and explosion:

Keep away from sources of ignition - No smoking. Appropriate measures should be taken to control the generation and accumulation of dust during conveying and processing operations..

### 7.2. Conditions for safe storage, including any incompatibilities

#### Material storage

Keep in a dry, cool and well-ventilated place. Maintain dryness of resin.. Maximum storage temperature 40°C.

#### Incompatible products

Strong bases\*\*\*

#### German storage class

Toxicological data are not available. Observe the usual hygienic measures for handling chemicals.

## **SECTION 12: Ecological information**

**Ecotoxicity:**The effects of resin pellets on the wildlife that may ingest them is not well understood. In the case of seabirds, some marine biologists believe that the fowl may not be able to pass plastic pellets through their digestive tracts. Thus, large quantities of ingested pellets may cause intestinal blockage, false feelings of satiation or reduction in absorption of nutrients, causing malnutrition and starvation. The goal of SPI's Operation Clean Sweep is zero loss of pellets into the environment..

**Environmental Fate/Information:**This material is considered to be non-biodegradable. Do not discharge product unmonitored into the environment.
